Myrica asplenifolia, ⁵ Endl.

This is an important ground covering shrub in burned lands where the growth of trees becomes thin enough it very quickly covers the surface. It recovers quickly if killed by fire. It does not grow in dense shade but will persist for a considerable time in the more open parts of the woods.

M. G. + Aug. 4. Mg, f. woods NW. Cascades.

Ostrya virginica, Willd.

This tree appears to be much more common and generally distributed in this reservation and fair sized trees are encountered in grown up pastures, notable south of the North Dam, where there are trees about a foot in diameter.

In similar locations. A group of good low topped trees is on the ridge north of the great oaks and several tall old trees are in a knoll near Trapelo St in the North Reservation.

1882

Dear Sir,
I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the above mentioned matter.

It is with regret that I am unable to comply with your request, as the same is not in accordance with the provisions of the Act of Congress of the 3rd March 1877, which relates to the subject of the above mentioned matter.

I am, Sir, very respectfully,
Your obedient servant,
J. H. [Name]

The first part of the paper is devoted to a study of the
 properties of the function $f(x)$ defined by the series

$$f(x) = \sum_{n=0}^{\infty} a_n x^n$$
 where a_n are the coefficients of the series. It is shown that
 the function $f(x)$ is analytic in the region $|x| < 1$ and
 that it satisfies the differential equation

3846

June 5

The first thing I noticed when I stepped
 out of the plane was the humidity. It was
 like a warm blanket that had been pressed
 against my skin for hours. The air was thick
 and sticky, and it felt like I was being
 hugged by a giant hand. I had heard that
 the humidity in the South was unbearable,
 but I didn't realize it would be this bad.
 I had been told that the humidity was like
 a giant hand that was squeezing you, and
 now I knew why. It was like a giant hand
 that was squeezing me from all sides.
 I had never experienced anything like this
 before. It was a completely new sensation.
 I had never felt so hot and sticky before.
 I had never felt so uncomfortable before.
 I had never felt so... well, so...
 I had never felt so... well, so...

*Pinus strobus*¹², ♀

White pines... here that may have stood in the pre-meral forests are on the southern end of Spout Pond and the western edge of the reservation. Virginia wood and the grove on the slope south of the North Reservoir are the finest groves. Small groups and trees are to be found in many places but they are not so generally distributed, neither do they seem as likely as in the Blue Hills, to become the prevailing tree ultimately.

edge of Reservation SW.

Pinus Strobus ¹³ L.

Pinus

Pinus strobus, L. 17

Mr. C. called through the Reservation.

Mr. R. i

16

Pinus Strobus, L.

Seedling trees are so generally distributed in parts of this reservation that it may become the prevailing tree over considerable areas. There are few large trees within the boundaries, but just to the east of them there are considerable numbers

Pinus Strobus, ¹⁷ L.

In the northern section are
a few fine large specimen trees
and a few seedlings.

1
Pinus sylvestris, L. Scotch Pine.

A few trees are growing near
the superintendent's house one of
which is about a foot in diameter.

B. 94. Aug 11. Inf. c. ~~at~~ S + W. Bowl Rock
c. Valley NW. Rattlesnake.

Quercus rubra, L. 4

The Red Oak is as common here as in the Blue Hills.
M. 94. Aug. 4. Mg. C. woods NW. Cascade.

The Red Oak is as common here as in the Blue Hills.

There is a large tree, which seems to be this species, near Linn St. & also on the steep slope west of the lower falls. Smaller trees are found in both sections but chiefly in the northern one.

Dislocation of joint

Rubus villosus,⁴ Ait.

Generally found in old pastures and in open wet runs in the edges of meadows - in the vicinity of old house sites. It does not persist long in shade - often gives way to the *Rubus hirsutus*.

Same as in M.
